

Discover the Raman Advantage!

Examine^R

High Performance Raman Microscope

DeltaNu presents a high performance Raman microscope at an affordable price. The **Examine^R** combines the quality of Olympus with the high performance of DeltaNu. This combination produces unsurpassed Raman microscopy with outstanding imaging and spectral performance.

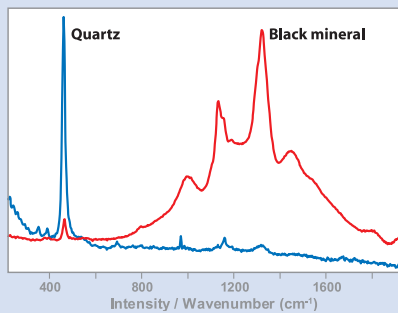

- Identification of micron-sized inclusions and contaminants
- Confocal depth profiling
- Chemical imaging
- Computer controlled XYZ stage*
- Diffraction limited imaging and spectroscopy
- Class I laser safety environment*

Count the Spots on the Dalmatian

Quartz
Black mineral

Jasper is an opaque, impure variety of quartz that can contain up to 20 % foreign matter that is usually red, yellow or brown in color. This Dalmatian Jasper was found in Mexico and is named because of its black spots. The Examine^R is able to distinguish the black spots which are mixed with quartz and foreign minerals.
